Local Merchants

Support Fur Farmers' Day

The Lac La Biche Fur Farmers' Association, which is sponsoring the Annual Fur Farmers' Field Day on October 30, is receiving good support from the local merchants. Various prizes have been donated, just to make interest ride that much higher in the competition.

Prizes donated include the following:

Robinson Stores—a wool shirt, this is for the best Blue mink of the day.

Hudson Bay Company—a wool blanket for the best mink of the day.

E. Courtney's Barber Shop—a silver cup; I.H.C.—W. Hamilton, two gallons of anti-freeze, and the Lakeside Motors one gallon of anti-freeze; Michael Hamar—27-piece lunch set.

The association is planning a program for the evening and the public is invited to attend the afternoon sessions as well as the program.

JUST IN CASE someone may have forgotten—Hallowe'en comes on Saturday, October 31st. Elaine Stewart, the only girl in a new motion picture named "Take the High Ground!" does pretty well at filling this picture with the aid of the moon, a black cat and a few stars!

New Trapping Season Starts With Fur Market In Depressed Condition

By T. W. PUE

LAC LA BICHE—Trappers in this district are about to start a new trapping season, but the condition of world fur markets doesn't make prospects look too bright.

Generally speaking, the prices offered for wild mink, squirrel and weasel are only fair while other prices for wild fur pelts are very poor. Ranch mink, on the other hand, has held up fairly good. Muskrat rates only about \$1.15 per pelt according to last season's catch.

There is no known market for rabbit, fox or lynx, once staples of the fur industry in this district.

Demand and prices for muskrat and beaver are the lowest in years. Top prices paid by fur dealers in

the market here were \$30.00 for wild mink, \$20.00 for ranch mink (regular) but \$75.00 for mutation. Squirrels fetch 40c to 50c apiece, weasel \$1.00 to \$1.50.

There is the possibility, of course, that with a change of fashion styles, world markets may up the demand for more pelts at better prices.

Olga Chwedoruk Is Late Autumn Bride

GRASSLAND — The Anglican Church at Grassland was the scene of a pretty wedding when Miss Olga Chwedoruk, daughter of Mr. and Mrs. Anton Chwedoruk became the bride of Donald Corse, son of Mr. and Mrs. Corse, of Grassland. The bride attired in a floor-length gown of white nylon and lace, full length veil caught in a coronet, and carrying a bouquet of pink roses was given in marriage by her father. Ceremony was solemnized by Rev. D. Greenough, of Lac La Biche. Miss Mary Chwedoruk, Miss Josephine Nowicki and Miss Rose Paskar dressed in similar gowns of yellow net with coronets to watched acted as the bridesmaids. All carried identical bouquets of yellow roses. The groom was attended by his brother Lester Corse as the best man and the attendants were Joe Chwedoruk and Paul Wowk.

The bride's mother chose a dress of blue and white, with matching accessories and was assisted in greeting the guests by the groom's mother who wore a brown dress. Ien Ladouceur and family.

of the bride's parents with a dance following at the Craigend Hall in the evening.

The happy couple left to take up residence in Grassland.

Speed is called outstanding factor in highway fatalities.

NOTICE TO RATEPAYERS M.D. ATHABASCA No. 103

The Secretary-Treasurer will be at Grassland to take in taxes on Saturday, Oct. 31, 1953. From 9:00 a.m. to 6:00 p.m. This will be the last day for receiving 2% discount on current taxes. Please bring your receipt for payments made after June 30, 1952. Also bring your tax notices with you when coming in to pay current taxes.

S. C. WARD, Sec.-Treas.

Investigator Greatly Impressed By Local Fire Brigade Showing

LAC LA BICHE—F. Miller, investigator from the Fire Commissioner's office was in Lac La Biche recently, during which time he conferred with the local Fire Chief, E. G. Dobson and Constable Kennedy, in matters pertaining to fire fighting and fire prevention. He also made it a point to inspect the local brigade and was highly impressed with the advancement that the boys have made.

At the present time the Brigade is highly interested in a contest sponsored by the National Fire Protection Association, and are doing everything in their power to make a good showing and possibly win. This would be a great honor to the town, and the members feel that with the co-operation of all the citizens they can go a long way. If the co-operation is as good as it was during Fire Prevention week they will be satisfied.

Two members of the Brigade, Fire Chief Dobson and Fireman B. Shanks, were delegated to attend the last town council meeting to discuss some of their problems, including the entrance to the fire hall, size of present building, and the heating. The town council was most co-operative and promised to start immediately on remodelling, so as to make the building suitable. It is planned to extend the present building some twenty-

five feet, insulate completely and install a full concrete floor. Proper heating will be supplied, so that the building will not only be a place to store the fire engine, but dry the fire hose, which entails considerable work.

The Fire Brigade feels that not only will this addition be an asset to the boys, but to the town as a whole. They take this opportunity of extending their thanks to the council.

A committee consisting of five members was appointed to set up a working constitution governing the personnel of the Brigade and to assure sound organization.

A brand new fireman has been added to the ranks of the Volunteer Fire Brigade in the person of a new son born to Mr. and Mrs. Harvey Marchelidon. The new fireman's name is Ernest. Cigars were in order at the last meeting and handed out by Fireman Marchelidon!

The weekly practice of the Brigade was held at two o'clock on Thursday afternoon, and for the information of the public it was decided that the fire siren will be sounded only in case of emergency or a fire. When the siren is sounded, remember that it is not a practice, but a real call, clear the streets, bring your vehicle to a stop at the curb, and above all else don't try to get there ahead of the firemen and congest the traffic.

No Plans Announced For New Elevator

Efforts of the Lac la Biche Board of Trade to interest another Grain Company to build an elevator in town have not yet borne the desired results. Representatives of some companies have visited the town and district but as yet no word has come that any new company has decided to build in Lac la Biche.

Formerly this area had very little grain farming but each year more and more land is cleared, ploughed and devoted to grain production. The Board of Trade is anxious to see that adequate facilities are provided for the use of grain growers in marketing their crops without having to haul to distant points.

Helina

Mr. and Mrs. Orne Eddiburn and family from British Columbia, and Mr. and Mrs. Pike from Boscombe were visiting at the home of Mr. and Mrs. Wilmer Elliott.

Mr. and Mrs. Earl Whelen made a trip to Edmonton recently. Joe Strothers had a surprise recently when his niece and her husband drove up from Empress, Alberta, to visit him for a few hours.

Mr. and Mrs. Cecile Davis, Arlene and her brother Evelyn Le May from Lac la Biche were visiting at the home of Mr. and Mrs. Einar Huser.

Eli Suhan has returned to the district after being away for harvest. His brother Peter is expected soon.

Principals In Fall Wedding To Reside In City

A lovely fall wedding was solemnized in the United Church at Lac La Biche when Miss Denise Berzinski, became the bride of Donald Dickson. Miss Berzinski is the daughter of Mr. and Mrs. Brezinski of Owl River, while the groom is the son of Mr. and Mrs. Dickson of Colinton.

The bride, attired in a white floor length nylon gown, topped with a three-quarter length veil caught in a coronet and carrying a bouquet of red roses was given in marriage by her father, with D. A. Greenough officiating. Miss Marian Hocko of Big Bay, dressed in a rose colored gown and carrying a bouquet of pink flowers acted as maid of honor, while Miss Grace Dickson of Colinton, attired in a pink gown with matching bouquet. Miss Annie Brezinski of Lac La Biche wearing a yellow gown and carrying a bouquet of orange flowers, and Miss Helen Puchyr of Edmonton in a mauve gown and a bouquet of purple flowers were the bridesmaids.

The groom was attended by Sandy Michalcheon of Owl River as best man and the attendants were Ernest Pare of Colinton, Andy Stuparyk of Lac La Biche and Mike Hocko of Lac La Biche.

A reception was held at the home of Mr. and Mrs. J. Hocko at Big Bay, with the bride's mother attired in a green dress, white hat and matching accessories greeting the guests. She was assisted by the mother of the groom who wore a blue dress with matching accessories.

Mr. and Mrs. Dickson will be making their home in Edmonton.

Nov. 6th Is Date Of Livestock Show

ST. PAUL — Thirty-six head of beef cattle will be offered for sale at the first annual Livestock Show and Sale November 6. The event will take place in St. Paul arena.

Herefords, Shorthorns and Aberdeen Angus are the three breeds to be featured. Such renowned names in the cattle trade as Domino, Norseman and Prides of Aberdeen will be featured.

Plamondon School Initiation Day Is Unusually Successful Affair

PLAMONDON — On Monday last week some very unusually dressed boys and girls strolled around town. It was grades 9 and 10 being initiated and they really were grand sports. The whole thing was planned and organized by Dorothy Charbonneau and Fernande Belanger of grade 12. Joe Menard, Lucien Dougou, and Bernard Dakin were said to be the best, dressed as ladies, with lipstick, earrings and all the trimmings.

To get even with them, grade 9 then initiated grade 12. Dorothy had to dress as a baby, even to the nipple, but with a gunny-sack dress. Fernande had to wear his father's work clothes!

**AURORA
THEATRE**
Lac la Biche Alberta
PRESENTS
Wed. and Thurs., Oct. 28-29—
"THE GIRL IN WHITE"
(Drama)
Starring: June Allyson, Arthur Kennedy, Gary Merrill, Mildred Dunnock, Jesse White. 8:30

Farm Women Ask For New Community Property Law In Alberta

A delegation from the Farm Women's Union of Alberta met recently with the provincial cabinet to present a brief.

Mrs. W. C. Taylor of Wainwright headed the delegation and other members were Mrs. C. T. Armstrong of Calgary, Mrs. Jack Harold of St. Albert, Mrs. Winifred Ross, Millet; Mrs. C. D. Fuhr, Stony Plain; Mrs. G. Osbaldeston, Fort Saskatchewan; Mrs. Cecil Keast, Viking; Mrs. C. E. Jones, Millet, and Mrs. C. R. Braithwaite of Red Deer. Ministers present were Premier Manning, Hon. Dr. W. Cross, Hon. D. A. Ure, Hon. A. O. Aalborg, Hon. L. C. Halmrast, Hon. A. J. Hooke and Hon. Dr. J. L. Robinson.

The women were particularly interested in having a study of Community Property Laws made and such laws introduced in the province and also in seeing the Devolution of Estates Act revised; in having alcohol tests made compulsory for all drivers involved in accidents; in some type of assistance being given young farmers who are anxious to settle on the land; in having the government make provision for the erection of homes of the aged in municipal districts; in the introduction of Provincial Health Insurance; in the establishment of more Health Units; in more emphasis being placed on the fundamentals in education, and many other subjects in the fields of health, education and social welfare.

They thanked the government for publishing the booklet "Government Services Guide" at the suggestion of the FWUA and suggested a pamphlet on "Other Ser-

vices Provided in Alberta" to be used in conjunction with the "Guide".

The delegation was very pleased with their reception, with the thorough discussion which took place and the amount of information obtained.

Helina

The district farmers are very happy these days. They have their grain threshed.

Mr. and Mrs. Nick Keeper of Edmonton were visiting at the home of Mr. Keeper.

Atmore

The Atmore Hotel is under the management of Mr. Wilfrid Lamarre and his brother Fedele. Both families took over on Oct. 1. Mr. Omer Poulin, who still owns the place, has moved with his family to Grande Prairie where he will work as real estate agent. A farewell party was held at Mr. William Ballard's home for Victor, Roland and Claire. The family has always taken a very active part in all of Atmore's activities which was greatly appreciated. Best wishes go with them.

Bernard Dakin is in charge of the skating rink. Every night in the hall a good number of volunteers, men and boys, rebuild the boards for the rink.

Atmore intends having a well-organized hockey team and everybody is invited to co-operate, because it is the only way of ever achieving a community affair.

Father St. Arnaud is back from a business more than pleasure trip from Quebec. On his way to Shawinigan Falls he visited friends in St. Boniface, Hull and Montreal. He was very glad to come back and settle down to work.

From now on mass on Sunday will always be at 10:30, as Father does not have to go and say mass in Berny anymore. A very nice

Favorite RECIPE

OATMEAL COOKIES

1 cup butter
1 cup brown sugar
1/2 teaspoon soda, dissolved in
1 cup hot water
2 cups rolled oats (fine flake)
1 cup flour
1/2 teaspoon salt

Will be soft, so leave for 15 minutes before rolling out thin and bake about 15 minutes. This recipe has been in my family for about 40 years.

Apparently, as with many Favorite Recipe fans, oatmeal cookies are favorites in the home of Mrs. Wm. Albert at Alberta Beach, and for sharing her recipe with our readers Mrs. Albert received \$1.00. Send your Favorite Recipe to P.O. Box 4430, South Edmonton.

Quick Canadian Quiz No. 141

1. What one province produces more wheat than all the rest of Canada combined?
 2. Of all the goods produced in Canada, are more sold abroad or consumed at home?
 3. How many miles long is the Niagara River?
 4. Which Canadian province has the highest birth rate?
 5. How many Canadians are employed in agriculture, in manufacturing, in wholesale and retail trade?
- ANSWERS:** 1. In agriculture, 827,030; in manufacturing, 1,360,002; in trade, 709,703. 2. 33 miles. 3. Saskatchewan. 4. Newfoundland. 5. Canadians consume about three quarters of what they produce, sell abroad about one quarter.
- (Material supplied by the editors of Quick Canadian Facts, the handbook of facts about Canada.)

The French are still wary of approving the European army treaty.

THE LIGHTER SIDE

Beats All

A balky mule has four-wheeled brakes.
A billy goat has bumpers.
A firefly has a bright spotlight.
Rabbits are puddle-jumpers.
Camels have balloon-tired feet.
And carry spares of what they eat.
But still I think of nothing that beats
The kangaroos with rumple seats.

Girl In the Dark

Boy: Why were the Middle Ages called the Dark Ages?
Girl: Because there were so many knights.

Old Hand

Doctor: Your cough sounds much better this morning.
Patient: It should. I've been practicing all night.

Roll Call

Sergeant: Private Jones?
Voice: Absent.
Sergeant: Quiet! Let Jones answer for himself.

Autumn Gossip

Daughter: I found a horseshoe this morning.
Mother: Do you know what that means?
Daughter: Yes, it means that some horse is running around in his stocking feet.

DR. F. J. GREANEY,
Director,
Line Elevators Farm Service,
Winnipeg, Manitoba.

Sponsored by the following companies: Federal, Alberta Pacific, Pioneer, Canadian Consolidated, Peterson, McCabe, Parrish & Leimbecker, Inter Ocean, Independent Union Milling, Canada West and Quaker Oats.

Why Seed Tests? Know Your Seed!

Sure, your eyes can tell you a lot about the seed value of the grain you are keeping for planting next spring, but they cannot tell you how well it will germinate, or whether or not it is contaminated with smut. Only through special seed tests is it possible to determine these important seed factors. Seed tests help you to know your seed.

Free Tests Available—As a service to farmers, the Line Elevators Farm Service operates one of the best central seed-testing laboratories in Canada. This laboratory will test any prairie farmers' seed sample of wheat, oats, barley, rye and flax, free of charge. All you have to do is take a sample of the seed you want tested to the nearest Agent of any of the Line Elevator Companies listed above. The Agent will forward your sample to Winnipeg for testing, and return the results to you.

Three Important Tests—Three types of tests are used to evaluate farmers' cereal seed samples. These are: (1) A germination test to determine germination percentage, or seed vitality. (2) A seed-washing test to determine whether or not the seed is contaminated with smut, and needs to be treated for smut control. (3) A test for weed seeds. The advantages of these tests need little comment. Good seed, as every farmer knows, must be of good germination, free of smut or other diseases, and free of weed seeds, other crop seeds and trash. Avoid risks! Know your seed! Have the grain you intend to use for seeding purposes tested as soon as possible. Plan now on planting only pure, clean, healthy and high germinating seed in 1954.

Warning—According to the Canada Seeds Act, all seed advertised, offered for sale, or sold in Canada must be tested at a government seed-testing laboratory. Tests made by the Line Elevators Farm Service are not "official" seed tests. Farmers who want to get an "official" test on their seed should send their samples directly to the Plant Products Division, Canada Department of Agriculture, at Winnipeg, Saskatoon, or Calgary.

Nice and Fresh

Customer: This coffee tastes like mud.
Waitress: Well, why shouldn't it? It was ground this morning.

Dog Team

Jim: Why do you call your dog Baseball?
John: He catches flies, chases fowls, and runs for home when he sees the catcher coming.

Foul Weather Warnings

"Hiram," exclaimed Mrs. Corn-tassel, "that candidate you don't like is coming up the road. What'll I say if he wants to kiss the children?"
"Don't say anything. Just call 'im back to the kitchen and give 'im plenty of bread and butter and molasses."

In a London theatre a tragedy was being played. The aged king tottered to and fro on the stage as he declaimed, "On which one of my two sons shall bestow the crown?"
A voice came from the gallery, "Hi says 'guv'nor, myke it 'arf a crown apiece."

Grande Prairie Expects Population Expansion

GRANDE PRAIRIE (BUP)—Town council of this bustling northern Alberta town is studying a 10-year development program which forecasts a city of 6,000 people by 1963.

Basing the analysis of future growth on a present population of 3,300, the report points out that the town's population within a decade would also have a suburban area of about 1,000 people. The 10-year program, divided into two five-year phases, foresees the establishment of three neighborhood units complete with schools, shopping facilities, and other services.

My girl friend phoned to say she was coming to spend the day with me. When the time for her arrival came I heard the expected knock on the door and, planning to scare her as she entered, called out, "Come in!" As the door opened I jumped at it and yelled, "Boo!" at the top of my voice. Imagine my embarrassment when it turned out to be the new parish priest, and not my girl friend, who had just walked in!

For Better Eyesight

Extensive surveys have shown that about four out of ten children are handicapped in school performance by visual problems. A study into the reasons of this serious condition among our school children by a prominent authority on child development has revealed a rather far-reaching conclusion that should be of vital concern to all parents and teachers.

Dr. Arnold Gessell, former head of the Clinic of Child Development at Yale University concluded his extensive study with the following remarks:

"Seeing is not a separate isolable function. It is profoundly integrated with the total action system of the child—his posture, his manual skills and co-ordination, his intelligence, and even his personality makeup.

Indeed, vision is so intimately identified with the whole child that we can not understand its economy and its hygiene without investigating the whole child.

Vision therefore may become a key to a fuller understanding of the nature and the needs of the individual child. He sees with his whole being. Eye care involves child care."

The surveys indicate further that when they enter the first grade about 25 per cent of the children have visual handicaps. The proportion rises almost steadily and at the end of the eighth grade up to 53 per cent, have visual handicaps.

One major cause for this substantial increase during the school years is the dark, drab, poorly lighted, improperly furnished classroom. In many cases this cause is preventable if the teacher takes the initiative.

A Deep Descent

Professor Auguste Piccard recently rode a diving contraption down to a depth of 10,000 feet under the surface of the ocean. It was the deepest descent ever recorded by man, and carried the professor two miles under the water.

The Swiss-born scientist reached the bottom of the Tryrrhenian Sea at exactly 10,334 feet. The professor, who was accompanied by his son, required two hours and twelve minutes to make the dive. The two Piccards rode in a small, windowed compartment, which was attached beneath the diving box, and a searchlight in its hull allowed them to see what went on in the inky blackness as they descended.

The noted scientist has now stood on the bottom of the ocean and seen an ocean life no other human has ever witnessed. His record descent will be valuable for scientific reasons but it is a tribute to the 69-year-old scientist himself who once was a famous balloonist. In fact, Dr. Piccard was one of the first to conquer the stratosphere in a balloon and now can accurately be described as an explorer of both the stratosphere and the ocean depths. In other words, one might say he has had his ups and downs.

On Fat Drinkers

Dr. Grace Eggleton, of the University College, London, recently told delegates to the Second International Conference on Alcohol and Road Traffic, that fat people are affected to a greater extent by alcohol than thin ones. One of the reasons for this seems to be the fact that alcohol concentration in a stout person will nearly always remain higher than in thin persons because in the thin person it dissolves in fatty tissue.

Another thing which affects the safety of driving while under the influence of alcohol is the amount of practice one has had in driving, Dr. Eggleton said. Those who have driven for many years seem to be better able to cope with the effects of alcohol than those who have driven only a short time.

The general opinion at the conference seemed to be that the effects of alcohol vary widely on different individuals. But the fact remains that most fat people get more of a reaction than thin ones. Our advice to both fat and thin drivers is to refrain from all drinking for twenty-four hours before driving. When highway fatalities are occurring every week, and injuries running much higher, one should not have to argue the point to convince drivers of its merit.

Children Are Friendly

If you live next door to a black Negro, yellow Chinese or red Indian family, does it make any difference to you? Do you feel the same towards these people of different race and color as if they had your color of skin, your racial background and your religion?

Well, if you don't, you can take a tip from your little boy or girl. Chances are the children are so busy having fun with one another that they don't permit prejudice to interfere with their happiness. They don't know racial or religious prejudice until adults teach it to them.

It is important that we adults, too, don't let racial or religious prejudice interfere with the God-given right to wholesome, friendly relations with one another. We can be much happier if we judge our fellows purely by our assessment of them as individuals and not on the false concept that this or that racial group is inferior to ourselves.

Another important point to remember is not to prejudice our children in their relations with the children of others. Canada is a shining example to the whole world of how two great national groups—French and English—have been able to co-exist and work together peacefully for nearly two centuries. Let us make that national policy the policy for the back yard and the neighborhood playground.

A Matter of Right and Wrong

Calgary Albertan

We are amused, in a sadistic sort of way, by the discussion on whether condemned murderers ought to be hanged, electrocuted, gassed, or given a lethal injection. Britain's Royal Commission recommended staying with hanging. It rejected electrocution and the gas chamber. But it also thought that further study ought to be given to lethal injections as a method of execution. "The needle is better than the noose," says the Vancouver Province in comment.

There may be less cruel ways of killing people than hanging them, but the real question is whether they should be killed at all. We say not. We say it is wrong to kill even a murderer. The old eye-for-an-eye law should have been long since superceded. The real cruelty is not in those few seconds on the gallows but in those long weeks in the death cell. The real wrong is not in the possibility of a bungled hanging but in the taking of a human life. Legalized executions are wrong, and no amount of refinement will make them right.

Following publication of the British report, some doctors were quoted as saying they would never administer such an injection or train others to do so. It was against their professional oath. Their science was dedicated to the preservation of human life, not to the taking of it.

All honor to them. If other groups took the same view, if others would withhold their tacit support of executions, then perhaps some day soon executions would be abolished.

The British commission was not asked to study whether capital punishment should be suspended, so it did not go into that. Justice Minister Carson has promised that a committee of the Canadian Parliament will be set up to investigate that very question. We hope there aren't too many lawyers on the committee, and that all members approach the subject as humble wayward mortals.

Note and Comment

"Destroy your cities and in a year they will be rebuilt; but destroy your agriculture and grass will grow on the streets of your cities in a year."—Sir Horace Plunkett, noted organizer of farm producers' co-operatives.

The highest price ever received for Canadian wheat was \$4.02 a bushel, basis seaboard, for a small lot sold by the Canadian Wheat Board in 1920.

The Bible Today

And they shall dwell in the land that I have given unto Jacob my servant, wherein your fathers have dwelt; and they shall dwell therein, even they, and their children, and their children's children, for ever, and my servant David shall be their prince for ever. —Psalm 135:25.

Voice Of The People

Readers are invited to make free expression of opinion on any subject. Letters should be short and concise. The Editor reserves the right to condense or reject any letter.

ORIGIN OF "ST. PAUL"

I read your paper with great interest, and submit the following on how my native town got its name.

"St. Paul des Metis" stands today as an ever growing monument to the hardy pioneers who settled that district over 50 years ago. From a sparsely inhabited outpost and mission in 1896 St. Paul is today the leading town in the vast territory of north-eastern Alberta. Although it is generally believed that St. Paul dates its history from 1909, when a great wave of colonization followed the opening of the St. Paul Reserve for homestead entry, the town was in its stages of development as early as 1896.

That year witnessed the foundation of the present town by Rev. Fr. Lacombe, O.M.I., of missionary fame, who established a mission in the locality where the RC church now stands.

The origin of the name is a controversial matter, but facts gleaned from an authentic and well substantiated source ascertain its present name from Rev. Fr. Lacombe, who christened the future metropolis "St. Paul des Metis" in honor to one of the early settlers whose name was St. Paul Cardinal.

St. Paul Cardinal settled in the locality and erected a dwelling on the land now occupied by the RC cemetery.

Prior to the founding of the mission the vicinity was referred to as "A place where St. Paul Cardinal lives," and it was known throughout the whole Saskatchewan valley. This was a family name so it was omitted and "des Metis" added in reference to the native people.

via Stony Plain, Alta.

B-B GUNS AND SPEEDERS

The fine fall weather has brought out the destructive nature of a few irresponsible 'teen-age' boys who, unfortunately, have been given B-B guns to play with. It wouldn't be so bad if the shooting was done out in the fields but it isn't. Parents of these boys should make sure that these guns aren't fired in town as it endangers the eyes of small children.

Another danger to small children and citizens of Morin is the speeding that is done in the town by our boys. Some evenings Morin is used as a regular race track.

FACT 1942
PAGE 20

END IS COMING

Man rises from stage to stage higher and higher. As the next stage dawns upon me I feel more keenly than ever the insufficiency of life. I cannot understand my origin, destiny, purpose, or nature. I chafe at the bars of the intellectual cage in which I am confined. Whence did I come, whither do I go? What is the object of my existence?

Dissatisfied with the answer the world had to offer I turned to the Bible. I found my answer in the truth and love in Jesus Christ (Col. 2:8). Look out! Perhaps some strange philosophy will carry you off with its empty deception. Then you will be persuaded by the common things of the world and not according to the abundance and grace of salvation through Jesus.

Sam Singh.

Calahoo, Alta.

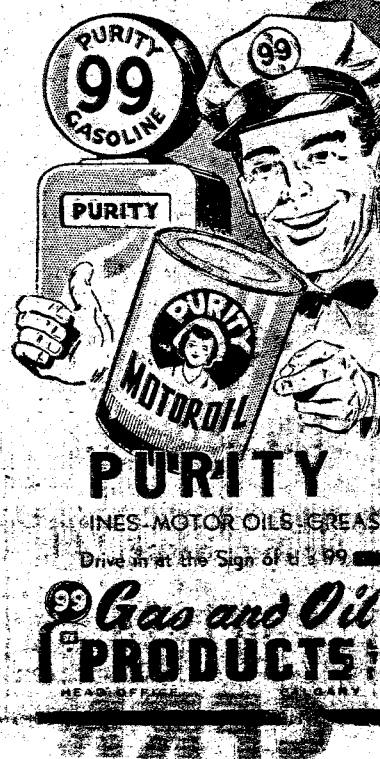

"JUST LOVE, NO RING"

It annoys me when I see or hear of Canadians advocating union with the United States. I think the majority of us agree that we love Uncle Sam but don't want to join him.

Mrs. B. Bowan.

BRIGHT SAYINGS

The Editor will pay \$1.00 for each child's saying printed. To qualify, item must be true, personal remarks of a child known to the writer. Address: Bright Sayings, P.O. Box 430, South Edmonton.

My 5-year-old brother was asked if he was anxious to get some school books and start going to school. "No," he said with finality, "because I can't read or write."

Edmond Despins.

Falher, Alta.

We had no barn on the homestead and had to do the milking outdoors regardless of the weather. In hot weather our little 3-year-old Martha would hold the cow's tail to keep it from switching our faces as we milked. One morning early it was raining and I said to her, "Don't go out and get wet." But loyal to her job, even on a day when there were no flies she said "But I have to go and hold the tail."

COFFEE TABLE

(No. 309)

If you were to shop for the coffee table illustrated, it is doubtful that it could be purchased within half of what materials cost if you made it yourself. True, there may be considerable difference in the finish, but you might even surprise yourself to see what a professional looking job you can turn out with the new plywoods and materials now readily available.

This handsome table has the appearance of having a solid wood top of almost two inch thickness. The top is actually made of 3/4" plywood with two-inch strips, also made of plywood, glued in position to hide the raw sandwiched edge. The legs and bottom brace are cut from stock 2x4s. The top can be mirror, or with the new plastic

surfaced plywood. One way to finish the top is to glue a piece of 1/16" sheet cork on it.

The full size pattern offered assumes that you never built anything out of lumber. It not only provides simple, easy to follow, step-by-step directions, but also eliminates the need for any special tools or skill. By merely tracing the pattern on the wood pattern specifies, you don't have much opportunity to go wrong. To further insure success, the pattern shows exact location for drilling holes and fastening one part to another.

Send 55c in coin or money order (cheques not acceptable) for Coffee Table Pattern No. 309 to Carpentry Dept., P.O. Box 4430, South Edmonton.

LETTER TO LOUISA

Good Looking Girl Loses Out On Dating; Younger Sister Popular

Dear Louisa:

I'm 16 years of age, 5' 2" in height, eyes of blue, well proportioned, weigh 115 lbs. and considered to be attractive. But this last statement is like a wry joke, because for a month I seem to be socially isolated. I haven't even got a girl friend. I lost my place as captain on the ball team. Girls less attractive are getting all the attention. I've been going out with a boy for a year and a half but he has now turned me down. I walk to school alone. My younger sister, only 14, can't keep up with all the dates she gets. Why should

everyone lose interest in me? I've got a good clean reputation.

All the new clothes I wear, a new shade of lipstick, or new hairdo doesn't help. Oh, please, Louisa help me out of this mess!

SHIRLEY

Answer:

It seems to me that two or three disagreeable events have just happened along about the same time, and perhaps things aren't as bad as they seem. At least, not if you will take a few bits of advice.

First of all, forget about your boy friend of one and a half years' standing. At your age he was only a passing fancy anyway. There are more fish in the sea than ever were caught and you are still young and have your whole life ahead of you.

Now, don't go dolling yourself up with new clothes, new lipstick and new hairdos to try and get back into the swing of things. You'll make the other girls jealous of you and the boys don't really care much for a painted doll.

Use some age-old feminine planning, scheming and psychology. Get interested in other activities. Try and find a useful place in the work of your church, and be ready to help someone less fortunate than yourself. Arrange to be invited out to social functions in your community and when you meet a new boy friend don't try to impress him. Listen attentively to his conversation and let him impress you.

Trying to make yourself popular the way you're going at it is like trying to get out of quicksand. The harder you try the deeper you sink. So quit trying, be your natural self, and try to help somebody else. Visit a sick friend. Call on an old couple who would appreciate a visitor. Try your hand at helping some distraught mother with a house full of troublesome children.

LOUISA

Will Extend Driving Tests

EDMONTON (BUP)—The aim of Alberta's driver testing program is to improve the motoring habits of the province's drivers, according to P. J. Rowan of the Alberta highways department.

The tests, launched in July in Edmonton and Calgary, will be extended to other sections of Alberta as soon as official sanction is given, Rowan said.

"Many difficulties have been overcome in the initial period," Rowan said, "but we have now reached the point where the program is operating satisfactorily with its aim to improve driver habits and traffic safety."

Woman Dies, Reported 180

MOSCOW (BUP)—The Soviet newspaper "Soviet Sport" said that a woman said to be 180 years old died in the Caucasus of the U.S.S.R. The newspaper claimed the woman had been the oldest living person in the world in reporting her death.

Foreign Operations Administrator Stassen has announced that the United States planned to rely more heavily on American colleges and universities for personnel in technical assistance programs.

News Oddities

3-D Church Windows

JACKSON, Miss. — Two of the stained glass windows in the Trinity Lutheran Church here are three-dimensional—the only ones of their kind in the world.

No Superman

COLUMBUS, O. — Little Larry King, 8, learned the hard way that he was no "Superman". Roused on his second-floor fire escape, Larry adjusted the silk scarf around his head and spread the towels which hung capelike down his back. He took off and landed—in a hospital bed, with broken wrists.

Crow Scares Cops

SYRACUSE, N.Y. — Hearing shrieks of "Help, Help!", sheriff's deputies arrived on the run to investigate. They found a crow perched in a tree, and two boys who explained that the crow had been trained to squawk for aid. The smart bird belongs to Walter Pope, proprietor of a gasoline station.

Quick Clean-Up

GREENFIELD, Mass. — Two convicts slipped away from jail recently, looted a house of \$1,000 in jewelry and clothing and returned to the lock-up 45 minutes later, with their absence unnoticed. Their escape might never have been known if they had not tried to sell some of their loot to a fellow prisoner about to be released.

Unlucky New Job

PASO ROBLES, Calif. — Needing a little extra cash, Kenneth Etter, also known as Camp Roberts, got a job driving a cab in this town. He had just started off on his first fare, when an automobile crashed into his cab. Unhurt, Etter declared his disbelief in names and promptly quit work for the Lucky Cab Company.

Truck Gets the Slip

NASHVILLE, Tenn. — Gilbert Martin, 50, drove his truck off a ferry dock while the ferry was across the river. He fell out of the water by a nearby boatman after climbing out the truck window, Martin told police. "I knew the river was there but I just wasn't paying attention. The first time I thought about the river, I was in it."

Double Doubles

GOSHEN, N.Y. — This town, which already could boast of possessing a double, President Eisenhower in the person of Harry Strong of White Plains, a native of Goshen, has another double. Associates of former City Judge Edmund C. Faulkner, of Middletown, have remarked recently of late about the remarkable resemblance to Secretary of State John Foster Dulles.

Gem Cache Seized

NEW YORK — Robert Edmund Deppa, 39, a native of Brussels, Belgium, and Samuel Lieberman, 46, of Brooklyn, were recently arrested on which custom officials called one of the biggest diamond smuggling hauls on record. Officials said they had seized gems totaling 1,439 carats and valued at \$225,000 when Deppa arrived in this country, piloting a Sabena (Belgian airlines) plane.

Charron

Mr. and Mrs. Harvey St. Jean of Jasper Place visited relatives in Charron.

Miss Ann Zuk paid a brief visit to Blue Jay and Charron.

Mr. Ulliak of Gourin has purchased Mr. Albert Willis' farm.

Mr. Louis Inicki now owns a nice Monarch car.

Mr. George Gauthier had the misfortune of running into the ditch with their new car, damaging the fenders slightly. It all happened when he was looking for a cigarette that he thought was thrown into the back seat.

Mrs. Gordon Henderson and Mrs. Albert Le Rouzic visited relatives in Charron recently.

Mr. and Mrs. Stanley Inicki motored to Porcupine, Saskatchewan, to attend a wedding.

Little Phyllis Makar is staying at Gregus's and attending school at Plamondon.

Mr. and Mrs. Holst of Boyle motored to Charron to visit their sons, Bill and Earl.

Egg Lake

Many families were favored with visitors for Thanksgiving. At the home of Mr. and Mrs. H. M. Olson, they were: Mrs. J. Chapman and daughter, Betty Lou. Mr. and Mrs. Ken Lawrence and Ed Lawrence, all from Edmonton.

Mr. and Mrs. L. G. Amiot had their son, Bernard and family from Poothills.

Mr. and Mrs. Maurice Lebeuf had Mrs. Marie Bessette, also Mr. and Mrs. Robert Joncas, all of Edmonton; Mr. and Mrs. Albert Gaudet from Plamondon, and Mr. and Mrs. Louis Ulliak of Gourin.

It is hoped the nice weather will continue long enough to give every-

body a chance to take their own in. There has been no heavy frost here yet and people are still picking sweet peas, pansies and daisies, etc., from garden. It is very unusual for this time of the year.

Plamondon

Miss Jeanette Schaub was seriously ill last week. She was in the hospital for four days, and is now recovering.

Threshing is all finished in the Plamondon district for another year.

Mr. and Mrs. Rudolph Culture of Edmonton were guests at the homes of Mr. Albert Richard and friends.

All the farmers in the district are hoping to have nice weather for a couple of weeks to finish all their fall work.

Charron

Mr. and Mrs. Louis Inicki and daughter, Annette, attended friend's wedding in Saskatchewan. A farewell party was held at Louis Inicki's for Mr. and Mrs. Zavone as they are going back to B.C.

Mr. and Mrs. Bruce Coonan visited in Charron on Sunday.

Mr. Fred Will spent a few days in Charron while combining his crop.

C. BAUER
 General Merchant

Groceries, Fresh Fruits and Fresh Meats

Red Head Gas and Oils
I.H.C. Farm Implements

Phone Toll Office, ATMORE

Gourin

On Sunday, October 11, everyone was overjoyed on the arrival of Father St. Arnaud's visit. Father St. Arnaud made a trip down East. His many friends hope he made a good time and everyone is glad to have him back.

Mr. Germain Routhier motored from Edmonton to visit his brother and sister-in-law, Mr. and Mrs. Eugene Routhier.

Father St. Arnaud and the young men of Atmore are trying to repair the skating rink. Everyone wishes them success.

Wedding bells will soon be ringing for Miss Jeanne Schaub and Andre Ulliak.

Little Yvette Routhier accidentally drank kerosene. She was rushed to the nurse. Her friends wish her a speedy recovery.

Mrs. Routhier is now home from the hospital and is feeling fine.

Threshing is nearly all done and combining is well underway.

Grassland

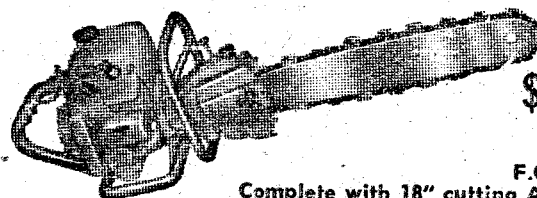

The wedding of Mr. John Kostyk of Redwater and Miss Ann Bluda of Grassland took place on Thursday, Oct. 22, at the Greek Catholic Church at Prosvita. A banquet and dance was held at the Grassland Community Hall the same night.

On Thursday, Oct. 15, Mr. Don Corse of Grassland was united in the bonds of holy matrimony to Miss Olga Chwedoruk of Rich Lake. The ceremony took place in the Anglican Church at Grassland, and

was followed by a dance next night in the Community Hall.

Threshing is just about completed in the district, and the yield on the whole is up to expectations. At time of writing there had still been no killing frost. This must be a record for the district.

Bake An Angel Food Cake

By JOYCE McCUTCHEON,
District Home Economist

Why not splurge for your next party and bake an angel food? Since eggs are expensive, make sure that your cake is a success. Egg whites should be at room temperature. For a medium-sized cake use 1 cup of egg whites. Sift together 4 times, $\frac{3}{4}$ cup of cake flour and $\frac{1}{2}$ cup of fine sugar. Set the oven at 375 degrees F. Add $\frac{1}{4}$ teaspoon of salt to the egg whites and whip until foamy with a flat wire whip or a rotary beater. Add 1 teaspoon of cream of tartar and whip until the egg whites stand in soft, moist peaks that are glossy. Add $\frac{1}{4}$ cup of sugar in 4 equal parts by sprinkling each fourth over the whites and whipping for 25 strokes. Add $\frac{1}{4}$ teaspoon of vanilla and $\frac{1}{4}$ teaspoon of almond extract. Whip 10 more strokes. Add the flour-sugar mixture in fourths by sifting each addition over the egg whites. Fold in with a rubber scraper or a large spoon. Use 15 fold-over strokes after each addition. When all the flour has been added, use 15 more fold-over strokes to completely blend. Pour batter into ungreased 9" tube pan. Make sharp cuts through the batter to remove the air bubbles. Bake for 25 or 30 minutes. A course-textured cake is the result of unbeaten egg whites, poor blending of ingredi-

ents, or too slow an oven. A tough cake may be caused by too hot an oven, not enough sugar, or over-mixing. A cracked crust is the result of overbeaten egg whites, too much sugar, or too hot an oven. Too much sugar or insufficient baking will cause a sticky crust.

For spicy variation, sift 1 teaspoon cinnamon, $\frac{1}{2}$ teaspoon of nutmeg with the flour mixture.

Split the cake into two layers. Spread a mixture of whipped cream, toasted almonds, and fresh fruit between the layers. Cover the top with whipped cream, sprinkled with slivered, toasted almonds. That's enough calories for this week.

LADIES

If there are any clubs or organizations interested in having a talk or demonstration given at one of the regular meetings, please write to the below address. Some of the topics are:

Choose Carefully Pictures In the Home

By JOYCE MCCUTCHEON,
District Home Economist

Pictures are very important to the decoration of a room. You may choose water colors, oil paintings, photographs, or silhouettes. To create a gay room, use a bright-colored picture. Landscapes and scenic photographs give a feeling of restfulness. Floral prints or samplers are best suited to a feminine room. Use a winter scene or photographs of dogs in a masculine room. Highly colored pictures are very popular with children. Why not put up a bulletin board for Mary to put up pictures she like in her room?

Make sure that your picture does not clash with the color scheme of the room. You can plan an entire room around the colors of a painting. If your room has lots of color, use etchings or photographs in black and white. The colors of your draperies and rugs may be repeated in the colors of the picture.

Care should be taken in the arrangement of pictures, that you consider the pictures, wall and furniture in relation to each other. A tall, narrow wall needs a narrow picture. A wide wall requires a broad picture. Patterned wall paper distracts attention from oils and water colors. Thus it is better to hang pictures in a group. Place them close enough to one another to prevent a scattering effect. Pictures should be hung flat against the wall not tilted away. Concealed hooks are best for hanging pictures. If your pictures are widely separated, line up their top borders. When hanging pictures vertically, hang the larger pictures above. Remember that your pictures can be well-chosen accessories.

WINTER TOPIC

If there are any ladies' organizations interested in having talks or demonstrations at their meetings, please let me know. I have several topics which might be of interest, such as:

- "Copper-Tooled Pictures".
- "Ideas for Preparing a Snappy Breakfast".
- "How to Prepare and Serve a Community Meal".
- "Color in the Home".
- "Easier Homemaking".

You may write to: Joyce McCutcheon, District Home Economist, Westlock, Alberta.

Mr. and Mrs. Elmer Plamondon are the proud parents of a baby

girl, born on Emille's birthday, Oct. 22.

Mr. and Mrs. Owen Bigelow and family moved to Winterburn Thursday morning. They had three trucks to move their furniture and livestock. Visiting them before they left were their daughter and her husband, Mr. and Mrs. Ronnie Myers of Edmonton.

Mrs. Andre Gaudet suffered a relapse and spent nine days in the hospital. She is well now and is back home.

The Trio Cafe has added a juke box to its already very modern restaurant.

Reverend St. Arnaud, just back from a very nice visit down east, came to Plamondon and drove Mr. and Mrs. Philip Plamondon, Sr. and Mr. and Mrs. Ephrem Cote to Atmore to visit his church and residence. Mrs. Plamondon doesn't get out very often, so she really enjoyed her little outing.

Willard Sullivan has returned after a fairly long absence working away from the district.

Spruce Valley

Congratulations to Mr. and Mrs. Mike Kochan of Spruce Valley who are the proud parents of twin girls, born in the Athabasca Hospital on October 6. They have to remain there for a while in an incubator but they are doing fine.

On October 18, a Ukrainian Show was held at Spruce Valley Hall. A large crowd attended. There will also be another Ukrainian show at Spruce Valley Hall on November 1.

It's time to buy your
MCINTOSH APPLES,
at reasonable price.
The school children like apples.

News From Other Alberta Towns

Committee Needs \$8,000 To Complete Arena

FALHER—A meeting of the committee for the Falher Memorial Arena was held in the home of the secretary-treasurer on Wednesday, October 14, 1953, at 7:30 p.m.

Present at the meeting were President T. Dentinger, Vice-president J. R. Turcotte, P. J. Demers, L. H. Chalifoux, R. Leduc and M. Martel. Others present were Mr. W. Desaulniers and C. A. Moulun.

Statement of account was prepared by Mr. W. Desaulniers of work to be done, and by the secretary-treasurer, of the bills to be paid. In all it was estimated that \$8,000 more will be needed to complete the arena, enough so that hockey may be played in it this winter.

A motion by Mr. T. Dentinger that three members go to Edmonton as soon as possible to see the Board of Public Utility Commissioners about reborrowing the amount of \$8,000 to complete the arena, was seconded by P. J. Demers.

Mover by M. Martel and seconded by R. Leduc that the secretary-treasurer prepare a list of bills to be paid, and how the \$15,000 was spent while Mr. Desaulniers prepares a list of work still to be done. These reports will be brought to Edmonton by the members going in the delegation.

Moved by J. R. Turcotte and seconded by T. Dentinger that C. Moulun write immediately for approval of electrical plan for the wiring of the arena.

Members of the delegation to go to Edmonton are as follows: P. J. Demers, M. Martel, J. R. Turcotte, who left Sunday for the city. Travelling expenses for the delegates will be paid by the Village of Falher.

Renting the hall to be thus in the future: \$20.00 per day for anyone for Falher; \$35.00 per day for outsiders.

The question of a janitor for the arena will be discussed when they are sure of getting the money needed to complete the building. This was the last item dealt with at the meeting.

Bank Accountant Transferred To Wainwright

FALHER — Guy Piche, assistant-accountant at the Bank of Montreal in Falher, has been transferred to Wainwright after a little more than a year's stay in this district.

Guy, a native of Gravelbourg, Sask., came here from Lacombe, July 1, 1952 and was from then on, active in most community organizations.

Last summer he was elected secretary-treasurer for the Falher Baseball Committee, for the Falher Canadiens Club and previous to that, an avid, high scoring bowler in the winter bowling league.

Guy will be replaced at the bank by Miss Carmen Servant from Falher, who will start work very soon.

Scholarship Winners Start Nurses' Course

TWO HILLS — Miss Anne Dmytrash, a Two Hills School Division winner of a \$500. Hotelmen's Scholarship, is registered for a degree course in nursing at the University of Alberta. She took her Grade XII in one year. Her average in the Departmental examinations was 83.7. Her parents live at Morecambe. Anne, who is 16, took a bus to a central high school.

Munson Girls Will Represent Alberta At Toronto Winter Fair Next Month

By G. W. ROBERTSON

Helen and Viola Howard of Munson, whose sewing project placed first in the 4-H Junior Club competition at Olds in July, will be the sewing team representing Alberta at the Toronto Royal in November. If the Drumheller district is true to itself it will be well represented at the big exhibition, but the Howard girls will be entered in a competition different from any of the previous ones in which the district has scored so notably.

The splendid showing that these young ladies have made to date is the result of persistent effort. Both Helen and Viola, whose ages are seventeen and sixteen respectively, have served a good while as Junior Club members. As long as seven years ago they were members of the W.I. Girls' Club in Munson and, more recently under the leadership of Mrs. Tom Sharp they have been active members of the Munson 4-H Sewing Club. They have worked faithfully. Each year they have finished a project and, on achievement days when all club members were entered, they have taken part in the fashion show. At these shows the girls modelled their own garments and in so doing shared an experience which helped to develop their poise and charm.

After the win at Olds, a party was arranged in Munson as a fitting tribute to the members of the community who had represented it so favorably. At that party the girls arranged their demonstration as they had previously done at Olds and were warmly applauded. Appropriate gifts were presented both to the girls and to their leader, Mrs. Sharp, as a token of appreciation.

All Alberta will be interested in these two young ladies when they go to Toronto in November. Behind their achievement stands a wealth of co-operation. In the first place the girls themselves have had to forego many attractions in order to concentrate on the work in hand, their parents have relieved them of some responsibilities in order that they might work on their project, the club of which they are members has provided the necessary atmosphere and the required leadership, and in addition to all this the girls have had the benefit of the interested guidance of the local District Home Economist, Miss L. A. Shtatz. As they enter the competition in Toronto, Helen and Viola Howard will have with them the best wishes of all their neighbors and friends in the Munson district.

"With what weapon did Samson slay the thousand Philistines, Tommy?" asked the Sunday School teacher.

"The ax of the Apostles," replied the child after a long pause.

H.S.A. See Films On Problems Of Children

Minburn H & S held their first meeting of the year Wednesday, Oct. 14 in the school auditorium.

Two films dealing with problems of children were shown before the president Mrs. J. Kufeldt was appointed from the floor to act as chairman.

"Know Your School" is to be one of the plans for the parents for this year. At the next meeting Mrs. R. Rustad, teacher of Grade I will conduct the parents about her room, commenting on various items of interest to them. Each teacher will make a similar tour at different meetings.

Part of the serving equipment has been purchased and it is hoped to have the remainder for the next meeting. A discussion followed regarding photographs taken of the school children last year. The parents voted in favor of having the photographer come again this year. Last year's photo of pupils and teachers has been mounted and is ready to be hung.

The secretary, Miss Ruth Gray gave information on the Banff home and school work shop which started October 19 and is to continue for one week.

Lunch and a social hour concluded this meeting.

1913 Thresher In Running Order

CAIRNS — Mr. A. R. Hanson has started up the "Yellow Fellow" threshing machine. This outfit was purchased in 1913 and has threshed many bushels of grain.

Bride-Elect Feted At Evening Shower

CZAR — Mrs. Arvid Kristiansen and Miss Kay Penman held a shower in the Lutheran Church kitchen on Wednesday night, Oct. 14, in honor of Miss Helen Serwachak, who is soon to be married. The guests arrived at the church about 8:30. Miss Serwachak arrived about 9:00. She was seated under a Japanese parasol decorated with crepe paper streamers. The wall around her was studded with yellow crepe paper flowers. Misses Doreen Grocock and Donna-belle Brown carried the gifts in a blue and yellow box on which was printed "For Your Shower."

Miss Serwachak received many lovely gifts for which she thanked everyone appropriately. Miss Penman and Mrs. Serwachak, assisted by a number of the ladies present, served a delicious lunch which everyone enjoyed.

High Prairie Inspectorate Holds Annual Convention

FALHER—The annual convention of the High Prairie inspectorate was held at the College in Falher on October 13 and 14. Over a hundred teachers registered at the assembly hall. Several speakers also attended the convention and delivered talks to the teachers. This was the second consecutive year that the convention was held in Falher at the request of the teachers.

Mr. S. Lefebvre, principal of Benoit School, acted as chairman of the convention. On the opening day, Rev. Fr. J. Forget, OMI, rector of the college, gave the invocation, prayer asking the blessing of God upon the discussions. His Worship Mayor Pat Demers and Mr. Paul Sicotte, chairman of the local schoolboard, extended a most hearty welcome of the men and school to all visiting teachers.

After the appointment of the convention committees, Dr. Van Miller entertained the teachers on the educational values of group dynamics. Associate professor of education for the University of Illinois, Dr. Miller proved himself to be a master of good public relations and an expert in school administration.

Mr. Byron, regional director, spoke on behalf of the Department of Education. He presented the group with a series of photographic slides taken during a year's study in Greece on a cultural mission.

Mr. Eric Ansley, general secretary of the ATA, spoke on behalf of the association. Superintendent G. Berry and Supervisor of Instruction S. D. Jerdine were also present.

On the evening of the first day of the convention, a delicious banquet was served at the college for teachers and guests. The Ladies of Ste. Anne prepared the banquet and acted as hostesses, while the young ladies of the town, under the expert leadership of Sister Anne, CSC, assured a constant service of the tables. Fr. Forest acted as chairman of the banquet and as toastmaster. A special program of entertainment followed. After a sing-song, Misses Therese and Marguerite Johnson sang a duet, a piano solo by Fr. Coyet, who later accompanied Fr. Prieur in an Italian Opera Aria, and, finally, vocal solos by soprano Jolande Laforge. Both banquet and entertainment were fully appreciated and praised by teachers and guests alike.

The second day of the convention was taken up by workshop groups and ATA business. Dr. Finn, representing the Faculty of Education of the University of Alberta, gave a lecture on Social Development as taken about by technical progress. The Falher Junior School staff held a panel discussion, while Fr. Forget presided at a discussion with the Senior High School teachers on the new program of Personal Development. Supervisor of Instruction S. D. Jerdine spoke on teachers of the Elementary School on reading technique.

The convention ended with the election of the executive of the High Prairie local for the coming year. Mr. Albert was elected president. Fr. Forget retained his function as vice-president, and Mr. S. Lefebvre became one of the councillors. Miss Kay Fulcher replaces Miss Mary MacKay as secretary-treasurer.

Sewerage, Water By-Law Passes, 166 to 18 Vote

MANNVILLE — The sewerage and water by-law was passed here when voters voted in favor 166 to 18 against recently.

Former Delia Man To Build Big Dam

VANCOUVER — Cleveland dam is being built near the Lions Gate Bridge, which links Vancouver City and the North Shore end of Burrard Inlet. It will back up on Capilano River a reservoir 3 1/2 miles long, covering 670 acres. Rising 325 feet from the river bed, this dam will be the highest in Canada, and its crest will measure 640 feet.

Work started in May, 1951 and will be finished in another six months. This huge project will supply Vancouver with extra water supply. The engineer on this immense job is James Eddlestone, who got all his schooling in Delia, son of the late Walter Eddlestone and Mrs. Eddlestone of Vancouver, B.C.

The late Mr. Walter Eddlestone took up land in this district in the early days before the railroad came through, and with his family he resided here until his retirement to Vancouver, B.C. in 1936.

Young Jim, as he is well known in this district, took his engineering course at the University of British Columbia.

Gas Lamp Explodes; Farmer Hospitalized

TWO HILLS — Frank Sokoloski, a district farmer, received severe burns to his chest and left arm as a result of a gasoline lamp explosion in his kitchen. He primed the gasoline lamp, then began to trim the wick of a coal oil lamp. He lit a match to light the coal oil lamp and fumes from the gasoline lamp came in contact with the flame and exploded. The house caught fire and Mrs. Sokoloski extinguished the blaze. He is now in hospital suffering from severe burns and shock.

Bridge To Replace Watino Ferry

DONNELLY — News has been received in the district that construction will soon begin on the new Smoky River bridge, replacing the Watino ferry.

Early Pioneer Dies In Recent Fire

AMISK — This district was shocked and saddened by the death by fire of Oscar Carlson, an early pioneer who lived south-east of town. Mr. Carlson's home burned down sometime Sunday night and his remains were found in the debris. Sympathy of the community is extended to his bereaved relatives.

FUA Discusses Home For Senior Citizens

The Drumheller East FUA was held at the Verdant Valley school Friday, Oct. 16, with 10 members present. Councilor Brown gave a report on Municipal Affairs. A lengthy discussion followed the reading of a letter from Hon. Mr. Cross regarding a home for senior citizens in this district.

Mrs. L. Leonard and Mrs. James Gaschitz supplied the lunch. The next meeting will be held in conjunction with the FUA on Nov. 18.

NEWS OF CANADA'S ARMED FORCES

IN THE NAVY

ROYAL CANADIAN NAVY TAKES OVER STATION WITHIN ARCTIC

A radio station 40 miles north of the Arctic Circle, which operated during the Second World War under the code name of Crystal III and provided weather information and radio aids to aircraft being ferried to Europe, has been taken over this month by the Royal Canadian Navy.

The radio station, on Padloping Island off the east coast of Baffin Island, was established by the U.S. Air Force with the approval of the Canadian government. The USAF continued to operate it during the post-war period, but has now turned it over to the RCN, which will operate it pending its manning by personnel of the Department of Transport.

The Padloping Island station will continue to carry out meteorological observations and provide radio navigational aids to aircraft flying northern routes. It is completely isolated and supplies and mail have to be dropped from the air during the long freeze-up period. The bulk of the station's stores are delivered by ships which

make an annual summer expedition to supply far northern stations.

Petty Officer William K. Carson of Toronto, a communications specialist, will be in charge of the station, which will have a complement of 18 men of the RCN, plus five Eskimos.

The communications staff of nine has received special training at the Meteorological School of the RCN Air Station, HMCS Shearwater, near Dartmouth, N.S.

Others at Padloping Island will include a four-man engineering staff to operate the power and heating plants, a radio technician and electrician's mate, a medical assistant, a naval storesman and a cook.

To Establish Overseas Ferry

The Air Force has announced the formation of an Overseas Ferry Unit to be located at RCAF Station St. Hubert, P.Q.

Designated No. 1 Overseas Ferry Unit, the new formation will be responsible for supplying the RCAF Air Division with additional F-86 Sabre jet aircraft and for all post-acceptance testing for jet aircraft slated for overseas service.

Under the command of Squadron Leader G. L. Middlemiss, DFC, 23, of Montreal, the unit will set up detachments at four points along the overseas ferrying route. Goose Bay in Labrador, Bluie West I in Greenland, Keflavik in Iceland and Kinloss in Scotland. This is the same route followed by the four Leap Frog operations undertaken by F-86 squadrons when proceeding overseas.

Flying the Atlantic became commonplace during the Second World War when Ferry Command delivered thousands of aircraft to the operational areas of Europe. However, jet crossings were developed only after cautious trials a few years after the war's end.

IN THE ARMY

NOT TOO EARLY TO GET CHRISTMAS MAIL READY FOR OVERSEAS

Army postal authorities had a word of advice this week for Canadian families whose loved ones will spend Christmas overseas on military service:

Mail early or your man will think you've forgotten him at Christmas!

Closing dates for Yuletide mail addressed to members of the Armed Forces serving in the Far East are as follows:

Parcel post and ordinary letters must be posted in time to reach Vancouver, B.C., not later than November 15.

Proper airmail to the Far East must be mailed in time to reach Vancouver not later than December 5.

Deadline for Christmas mail for Canadian troops serving in the United Kingdom and continental Europe is as follows:

Ordinary letters by surface ship must be posted in time to reach Montreal not later than November 27.

Parcel post by surface ship must be posted in time to reach Mon-

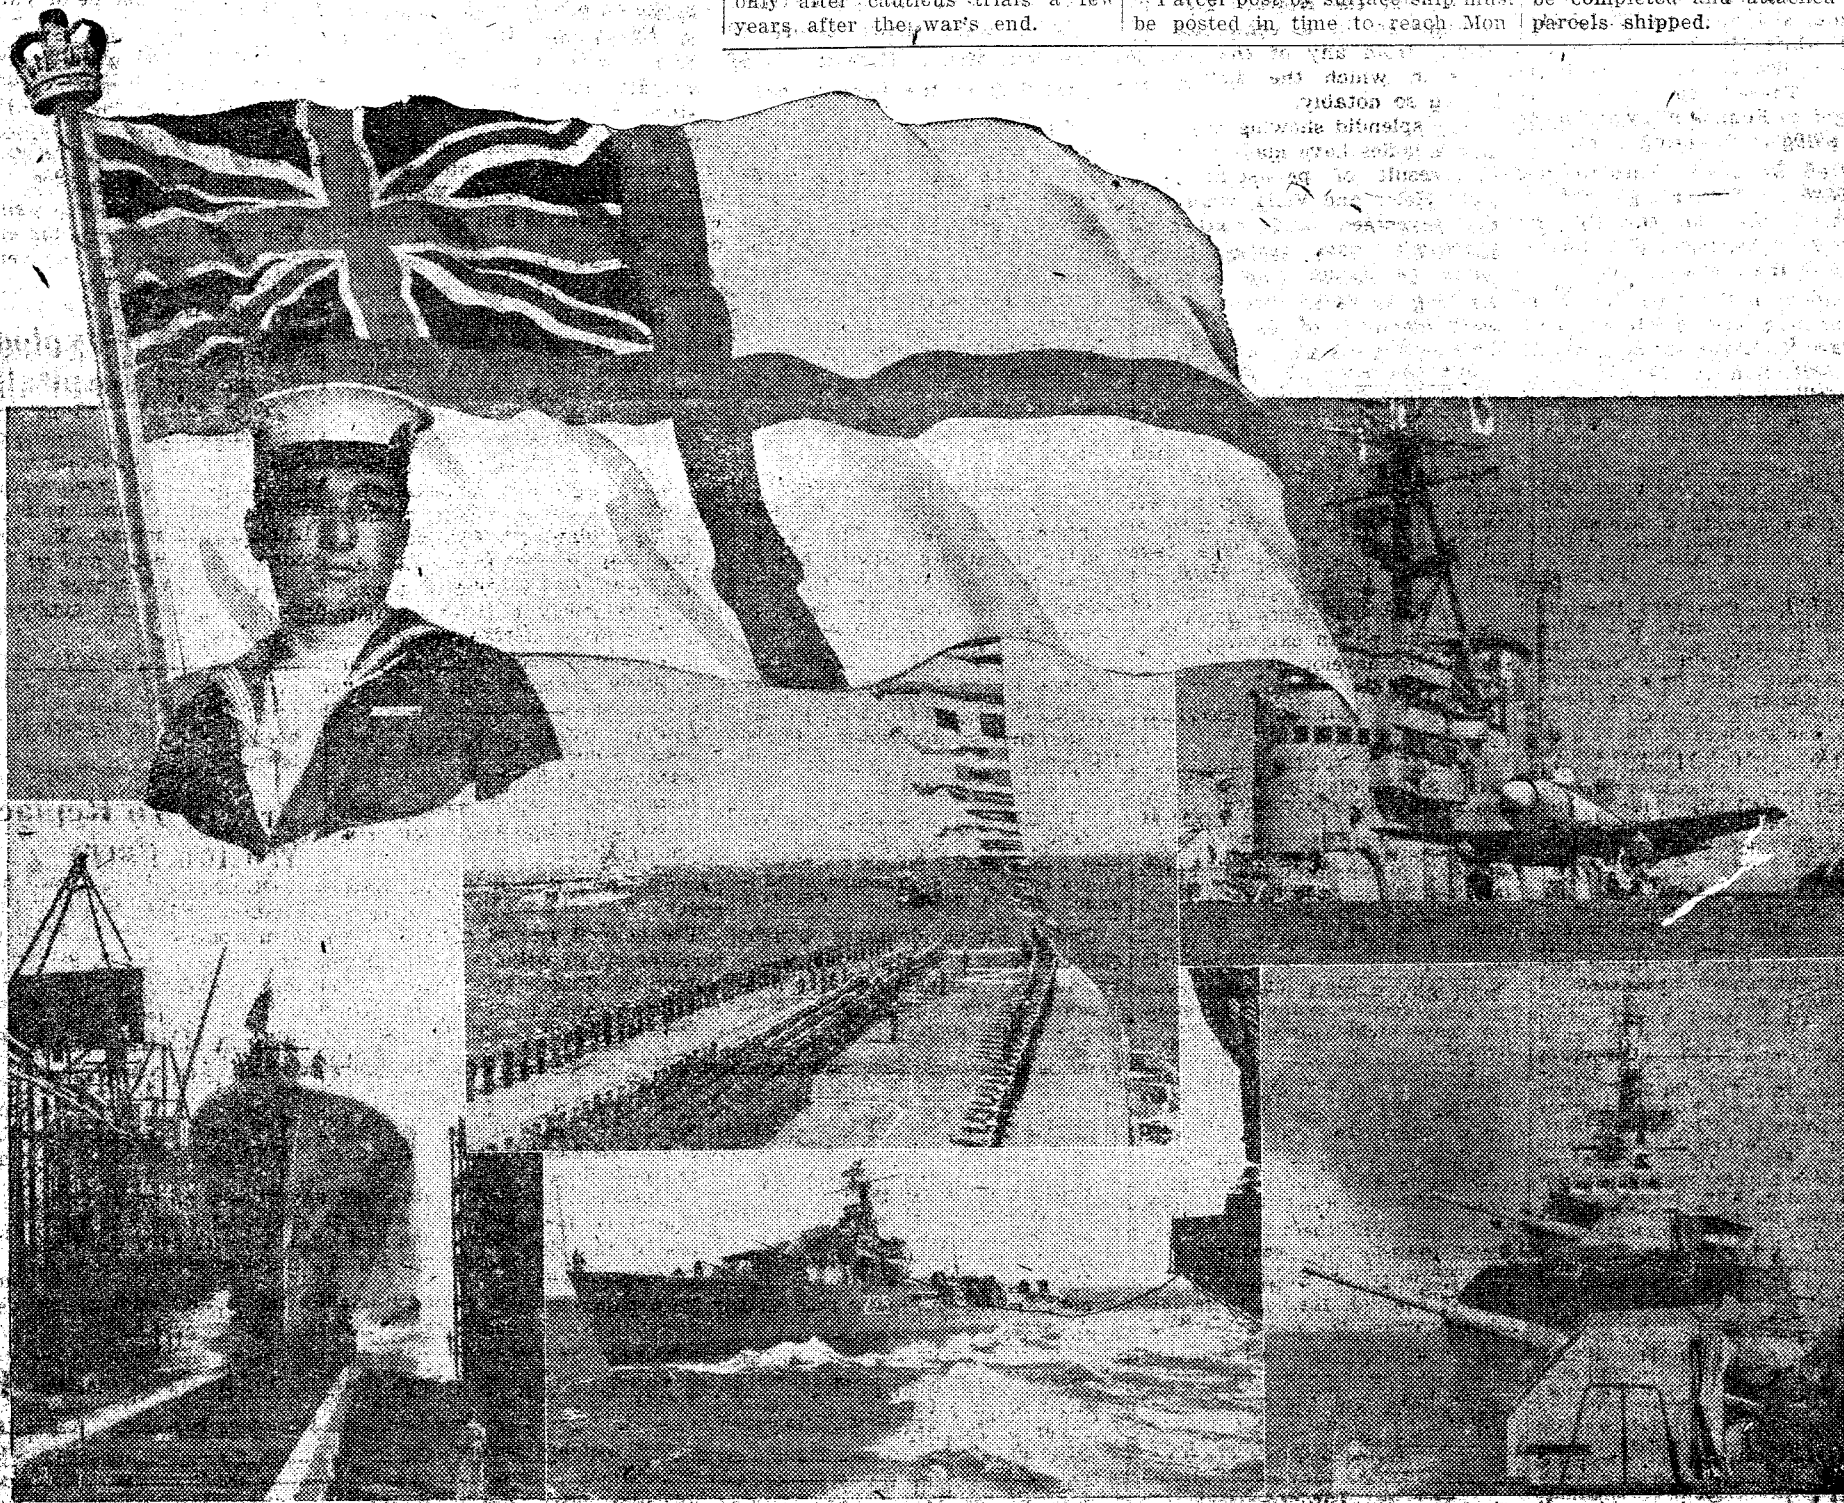

treel not later than November 25.

Although airmailed letters and parcels despatched to Europe from Montreal usually are delivered in about two or three days, postal authorities can guarantee no such service during the Yuletide season. Therefore, all mail intended for delivery to servicemen in the United Kingdom and continental Europe by Christmas must be overseas by:

Air mail and surface letters, December 16; parcel post, December 8.

Weight limit on parcels to the Far East and Europe is 10 pounds. Size and value regulations should be checked at local post offices.

All mail should be properly addressed and fully prepaid at the postage rate for overseas delivery. A customs declaration form should be completed and attached to all parcels shipped.

More than 3,500 officers and men have served on board Canadian destroyers which have seen action with the United Nations in the Far East. Many, like O/S Robert Simser, of Toronto (upper left), entered the navy after the Second World War and their first command jobs were those they earned in the Korean theatre.

"Excise Mariner," recently completed NATO war games held in the North Atlantic, provided a wealth of practical training for personnel of five Canadian warships. One of these was HMCS Magnificent and in the photo at the upper right a Sea Fury aircraft is pictured taking off from the carrier's flight deck during the exercise.

The centre photograph shows personnel of the Magnificent and of the Canadian Coronation Contingent standing at attention on the carrier's flight deck as the Royal Yacht, carrying Her Majesty Queen Elizabeth, approaches during the Naval Review at Spithead.

Expansion of the fleet is depicted in the photograph at the lower left, showing the launching of the destroyer-escort HMCS Skeena early this year at a Vancouver, B.C., shipyard.

Lower centre, shows the destroyer HMCS Sioux being refuelled while under way at sea. Guns of HMCS Cayuga are seen in action at the lower right.

—National Defence Photo.

EYESIGHT IMPORTANT, TREAT IT WITH CARE

His Sight—Your Responsibility

Your child's sight is of such great importance that every consideration should be given to its care. If his eyes are injured or inflamed, get medical treatment at once and don't delay with home remedies. Bathe his eyes with clean water if dirt gets into them.

If your child has poor vision he is facing life with a definite handicap. During his early years it limits his experiences and lessens his abilities. He becomes clumsy and unable to compete well with other children and this tends to isolate him from his playmates. Often it makes him the innocent target of scolding and general misunderstanding. He may seem hesitant and slow, awkward and even "stupid" when all the time the trouble is poor eyesight. Many a child has been unjustly branded as backward because his eyes are not up to their normal level of ability.

His Eyes Should Be Examined

The important thing to remember is that your child will not complain of poor sight. He doesn't know he is not seeing as well as he should and the parents usually do not realize that their child cannot see normally.

Every child should have a proper eye examination by a medical eye specialist as soon as the child is old enough to walk. A proper eye examination of all children should be done in any event before they start school.

Poor Vision—Quite Common

Recent surveys in Canadian schools have shown that about two out of five children in kindergarten and Grades One and Two had eye trouble of one kind or another. Most children are long sighted at birth. As the eyes develop the vision tends to become normal. If the long sightedness persists, glasses are necessary to

give normal vision and to prevent the development of cross eyes.

If short sightedness develops it comes on usually at above four or five years of age and may increase up to the age of sixteen. A few cases worsen further after that age. Short sighted children must wear glasses all the time. They should not try to read small print or hold their work close to their eyes. Sight saving classes are held in some schools for such children. Special books with large print are made for them and can be secured through provincial departments of education for the use of children for whom sight saving classes are not available.

Good Lighting Is Important

Make sure that good light is always available for your child doing home work or reading and he should not be allowed to read in bed or in poor light. Many homes are poorly lit and this adds to his difficulties.

It is important that schools have properly situated windows and adequate artificial lighting for dull days. In some new schools the blackboards are not black but gray, and yellow chalk is used, resulting in poor visibility. The board should be black and the chalk white to avoid eye strain.

If your child squints (one or

Mysterious Disease Destroying Alberta Beaver Population

EDMONTON (BUP)—Alberta fish and game commissioner, E. S. Huestis, has stated that although a steady increase in the province's beaver population has been recorded in the past 12 years, there has been "insufficient growth" in the northern areas.

Huestis said four teams of men have been transplanting beaver from settled areas to forest reserves and northern areas all summer. "So many are moving into the settled areas that we had to start transporting them to forest reserves and other areas," he said.

Huestis said many beavers have been reported to be dying recently of a "mysterious disease."

The disease strikes quickly and often kills off whole colonies. It has been more serious in Saskatchewan than Alberta, Huestis said.

Beaver can be trapped in Alberta from March 1 to May 15.

both eyes turn in, up or down) or blinks, has marginal redness on his eyelids, is clumsy when playing, holds things too close in order to see them—then he is showing signs of eye trouble. Be on the alert for any of these symptoms and when in doubt consult your doctor or local health clinic.

2 Killed, 1 Hurt In Head-on Collision

GIBBONS, Alta. — Two persons were killed and a third seriously injured in a head-on collision between a loaded gravel truck and a car near this town.

Killed were car driver Curtis Hoover, 43, and his passenger, Mrs. Evelyn D. Skogg, 41, both of Edmonton. Trucker Louis Langdeau of St. Paul, was taken by ambulance to an Edmonton hospital.

A native of Gadsby, Mr. Hoover came to Edmonton in 1933 to found Curtis Hoover industries and Hoover Machinery Co. Ltd. His widow is the former Christina Anderson of the Sylvan Lake district.

Both vehicles were badly damaged. Excessive speed is believed to be the cause of the accident.

Provincial coroner Dr. M. M. Cantor is expected to order an inquest.

THE NEW 1954 DODGE MAYFAIR LEADS IN BEAUTY

Twelve different solid colours and 48 two-tone combinations are available on the new 1954 Dodge cars now on display in Dodge-DeSoto showrooms across Canada. This emphasis on colour is carried through to the car's interior where two-tone colour combinations in trim and upholstery harmonize with the exterior body colour. A new, more massive looking grille sets off the increased use

of chrome that accentuates the longer body lines. Included in the Dodge Mayfair luxury series is the 4-Door Sedan shown above, a Mayfair hard top, and a Mayfair convertible. Completing the range of Dodge 6 cars for 1954 is the middle line Dodge Regent series and a lower priced Dodge Crusader series.

Women's Feet Getting Bigger

MONTREAL (BUP) — Women are getting big feet.

In fact, they're about twice as big on the average as grandma's. Fifty years ago the average shoe size for women was 4-1-2b, and now it's 7A.

Authority for the trend in foot sizes was Pegi Butler of St. Louis, Mo., a shoe stylist here for the annual Canadian shoe and leather fair.

"There is no question that modern women are bigger than their mothers," she said in an interview. "They also have different ideas about foot beauty." Like, for instance, a shoe on show at the fair that combines mesh, straw and leather—with an assortment of "high-heeled" black hoofers that laced up the front.

At one time, Miss Butler said, a small foot was considered a point of beauty and many women pinched their oversize feet into dainty numbers that were too small.

"They still do. 'We still occasionally have trouble with a woman who wants to fit her ideas instead of her feet, but it's getting rarer all the time,' Miss Butler said.

Telephone System Adds New Circuits

The Alberta Government Telephone is adding nine new circuits to increase long distance circuits between Edmonton and Calgary from 46 to 55, according to Highway and Telephones Minister Gordon Taylor.

Taylor told a special committee of the Edmonton Chamber of Commerce that 39 new circuits will also be put into operation north of Edmonton to improve long distance phone service in northern Alberta.

He added that capital investment in the government telephone system now stands at \$45,000,000 compared to \$21,000,000 in 1949, and that a further \$10,000,000 is being invested.

New Market Found For Alberta Stock

EDMONTON — A new market for Alberta's pure-bred stock has been opened in Texas.

A shipment of four large English White hogs from the Namah farm of Hon. David Ure, provincial minister of agriculture, left recently for Nachod, Texas, where it will serve as foundation stock at the ranch of M. S. Wright. The shipment is believed to be the first of its kind from Alberta to the southern state.

Newly Designed 1954 Dodge Offers 12 Solid 48 Two-Tone Color Choice

The newly designed, more massive grill heads the long list of styling changes to be found in the 1954 Dodge cars now on display in Dodge-DeSoto showrooms across Canada, according to Mr. Howard J. Rosebrugh, General Sales Manager Dodge-DeSoto Division, Chrysler Corporation of Canada, Limited. "The beautiful new styling," Mr. Rosebrugh added, "makes the 1954 Dodge an outstanding standard bearer of the many features of dependability for which Dodge has always been known."

The redesigned grill is only one factor giving the 1954 Dodge a lower and more attractive appearance. Its sweeping lines are reflected in the gleaming new chrome trim, which runs the entire length of the car curving down to touch the new chrome rear fender shields. Especially designed chrome wheel covers on the Mayfair series add another touch of sparkle to the car. "This year," Mr. Rosebrugh said, "Dodge cars are available in 12 solid colors and 48 two-tone combinations — the widest selection of colors ever offered by Dodge."

This attention to exterior style and color has been carried through to the interior where full use of the latest type nylon, rayon and vinyl fabrics has been made to harmonize in colorful and modern designs. The redesigned two spoke steering wheel is another interior style feature. In all two-door models, the division of the front seat is at 1/3 its width. This convenient seat division allows two people to sit comfortably in the front seat while rear seat passengers enter or leave the car.

In the six cylinder line of Dodge cars there is a complete range of three series. The Mayfair series, available in a 4-door sedan, a hard top and a convertible, offers luxury appointments and trim. The Regent series include a 4-door sedan, a club coupe and a suburban; the suburban which can be used either as a sedan or, with back seats folded, as a utility car for carrying heavy loads. The 1954 Crusader series provides the combination of fine features at a moderate price. Its fresh, clean-cut styling is available in three models, a 4-door sedan, a club coupe and a suburban.

"Dodge Dependability is built into the rugged 108 h.p. engine," Mr. Rosebrugh said. "The engine has a compression ratio of 7.01 to 1 and gives peak performance on regular gasoline." A number of engine features normally found only on much more expensive automobiles are included: an automatic electric choke, a microfilm oil filter (standard on all models except the Crusader) which filters out tiny carbon particles and other foreign matter that might cause wear on bearings and cylinder walls, a heavy duty oil bath air cleaner, a 4-speed manual transmission, and live rubber, floating power engine mountings designed to give a smooth, quiet performance. Other important engine features include an anti-kickout starting motor which operates with a single turn of the ignition key, a high capacity, 45-amp. air-cooled generator and a moisture-proofed ignition system.

Riding qualities have been given top priority in the 1954 Dodge cars. Sway-mounted springs make for a steadier ride and better curve-holding ability. A special sway eliminator bar helps keep the body on an even keel even on the sharpest curves, providing greater comfort and safety according to Dodge engineers. Shock-proof steering cushions made of live rubber absorb road shocks before they can reach the steering wheel. Another special feature this year, is the Dodge Griflow Shock Absorbers which has been improved as a further aid to a smooth ride.

Many Chrysler-engineered options are available on the 1954 Dodge cars. Hy-Drive transmission permits driving in high gear at all times. It does away with the need to shift gears in normal driving. Overdrive may also be added in production to save gasoline and engine wear. In operation, Overdrive permits the engine to turn over 30 per cent more slowly at road speed.

This year Dodge Power Steering is available as an aid to easier driving and as a safety feature. On the job all the time the car is in operation, Dodge Power Steering supplies hydraulic power that does 5.6th of the steering work.

Fox Killed Was Discovered Rabid

EDMONTON — Alberta's first rabies case since July was reported by Dr. E. E. Ballantyne, chairman of the central rabies control committee.

The disease was diagnosed in a fox killed Oct. 2 near Richmond Park 115 miles north of Edmonton. The fox was killed in a pig pen. Dr. Ballantyne reminded Albertans that the quarantine on dogs put into effect after the outbreak began 15 months ago still is in effect throughout the province and efforts continue to check the spread of rabies.

Hundred-Fold Growth Since 1905 Recorded By Alberta Industry

EDMONTON (BUP) — The Alberta department of economic affairs has reported that manufacturing has increased 100 times since formation of the province in 1905.

"The growth of Alberta's manufacturing industry has been impressive when it is considered in relation to the province's dependence on the main industry—agriculture," the department said.

Alberta's manufacturing industry now produces \$500,000,000 worth of goods and materials yearly, 100 times the value of production in 1905.

"In these 47 years," the government said, "the number of manufacturing plants increased from 97 to nearly 2,000. There are 27,000 persons employed by Alberta's manufacturing industries and their salaries and wages approximate \$60,000,000 annually."

The group manufacturing foods and beverages produced more than 54 per cent of the total annual production of manufacturing industries as a whole, or \$250,000,000 in 1952.

Next largest was the petroleum and coal products industry which accounted for more than 17 per cent of the total. The wood products industry followed with \$42,000,000 production in 1952, while the manufacture of iron and steel products was next, with a 1952 value of \$20,000,000.

Other industries, in order of their importance to manufacturing, were non-metallic mineral products, transportation equipment, printing and publishing, chemical products, clothing and paper products.

Juvenile Gangsters Held In Edmonton

EDMONTON (BUP) — Two juvenile gangsters were arrested by Edmonton city police last Tuesday after they held up a nine-year-old boy and robbed him of \$20.

Police said the pair, aged eight and eleven, confessed to holding up the boy with .22 rifles. They were planning to break into a cycle shop when they were picked up by prowler car officers shortly after midnight.

Police said the young victim was on his way to a drug store to change a \$20 bill for his mother when he was held up.

The pair have been lodged in Edmonton's south side Boys' home.

POET'S CORNER

SLEEP

By CHARLOTTE WARD, Perryvale

When the Creator formed mankind He instituted sleep. Mysterious is its nature, and its secret it doth keep. When sleep gains mastery o'er the brain, though consciousness has flown; Hence, sleep transition none can trace—its course remains unknown. Just how does the awakening come? How do sleep periods end, To bring back brain activity? what is the natural trend That lulls the senses into sleep, or a subconscious state? Are queries that perplex the minds of those who sleep debate.

Secretary, Gail Hayduk.
Rose Danyluk, Social Convenor.
Girls' Sports Convenor, Yvette Ricard.
Boys' Sports convenor, Wilfred Woychuk.

Grade Nine Representative, Tommy Maccagno.

The High School teachers are: Mr. F. MacMillan, Principal; Mr. J. Strembitsky, Vice-Principal, and Mrs. J. Hayduk. There are thirty-six students in grade nine, nineteen in grade ten, twenty-two in grade eleven and fourteen in grade twelve.

October 23 was set aside as an evening of entertainment, during which students and teachers participated in dancing, singing, games and of course a lunch. Miss Rose Danyluk was the convenor for the evening. To date plans have not been made for any special Halloween entertainment, but students are hoping that the convenor will come up with something good.

Lac La Biche Mission

Miss Antoinette Bourque is back home visiting her parents, Mr. and Mrs. Henry Bourque for a few months.

Congratulations to Mr. and Mrs. Roger Ladouceur on the birth of a daughter weighing 2 lbs., 13 ozs.

Mr. Isadore Schaub is employed at Namao airport in St. Albert.

Rev. Father Ricard has gone to Edmonton on business.

Mr. and Mrs. George Richard visited all their friends.

Rev. Father St. Fournieu of the Atmore district is sporting a brand new car.

The farmers are having a hard time selling their seed this year.

Plan Big Expansion At Oil Refinery

EDMONTON (BUP)—Plans for \$4,000,000 expansion of the McColl-Frontenac oil refinery at Edmonton were announced today by company officials, who said construction would begin immediately.

The refinery, built a year ago with a capacity of 5,500 barrels of crude oil per day, will be expanded to a capacity of 11,000 barrels per day.

T. C. Twyman of Montreal, company president, said expansion of the Edmonton plant is the measure of our confidence in the position of the oil industry in Alberta.

SEED NEWS

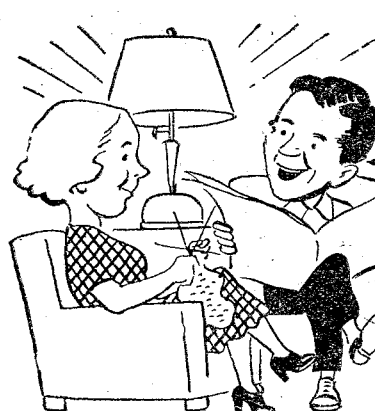

The Alberta Seed Growers' Co-op are accepting Alfalfa, Alfaswede, Sweet Clover, paying good advances. Due to the huge carry-over and production, Alsike and Brome are being accepted from present members only. This is only a temporary measure and it is hoped all deliveries can be accepted at a later date.

CHAS. LEBAS

Says...

"YOU DON'T HAVE TO GO TO THE CITY TO SEE THE BRIGHT LIGHTS... USE IMPERIAL NAPHTHA AND ESSO KEROSENE AND GET BRIGHT LIGHTS AT HOME."

Maybe you don't have to sew buttons on at night, or mend the children's school clothes... but it's a safe bet your wife does. And if there is anything she'd appreciate, it's a bright light to work under.

For reading your weekly paper or for figuring your farm plans for next year, it will be ever so much easier when you've got a bright, clear light to work with.

So... make it a point to see us about your supply of Imperial Naphtha and Esso Kerosene. Yes... we deliver.

JAMES ECCLES, Brampton, Ont., first tractor plowing champion of the world, who won his crown at the world plowing match, Cobourg, Ont., October 8 and 9. He defeated plowmen from ten other countries and Robert Timbers of Stouffville, Ont., Ontario and Canadian champion. Timbers placed third in the world match. Eccles, winner of the world trophy, the Esso Golden Plow, and Timbers will also compete in the second world match in Europe next fall. They will travel as guests of Imperial Oil.

Advance Payments Or Credit Aid Urged To Tide Over Farmers

EDMONTON (BUP)—Prairie farmers have completed harvesting their 564,000,000-bushel wheat crop but lack of immediate marketing outlets has set off demands for credit aid to tide farmers over until their grain are sold.

The crop, one of the largest on record but below 1952's record 664,000,000 bushels, was brought in smoothly as a sudden turn to sunny fall weather ended earlier fears that rain and hail would lead to killing frosts before the crop could be taken off the land.

Manitoba led the way as harvesting got under way there in August, and combines began to hum across the prairies with harvesting spreading through Saskatchewan and into northern Alberta, where most operations wound up during the week-end.

The third successive wheat crop of over 500,000,000 bushels was plagued, however, with lack of storage and shipping facilities, and marketing headaches fell onto farmers' shoulders.

Calls for credit aid to tide farmers over until the new harvest reached the markets were heard from the three prairie farm unions and other sources.

The spectre of a bountiful crop becoming "the explosive force which might destroy our economy" was seen by Alberta Liberal party leader J. Harper Prowse, who forecast "widespread depression and economic distress" unless aid was extended to farmers.

Prowse disclosed that he had asked federal authorities to aid farmers who are unable to deliver their grain to market by either giving them "payments in advance of actual delivery", or "credit on reasonable terms from our credit institutions on the security of deliverable stocks of grain."

He said, "Many of our farmers

have not been able to deliver enough of their grain to meet current expenses," and added, "I have assumed the responsibility of writing to Ottawa recommending that they take steps immediately to put into the hands of our farmers the purchasing power necessary to maintain business at a healthy level."

Co-owners Of Meat Market Feted On Retirement

NEWBROOK — On Thursday evening a farewell party was held in the Community Hall in honor of Max Cebrynski and Annie Deering, co-owners of the New Brook Meat Market.

The hall was full of well-wishing friends who came from all the surrounding districts to wish them farewell. A buffet supper was supplied by the ladies and the couple received a chest of silver, a leather wallet and other useful articles. W. Cebrynski is retiring from business and is going to reside on his farm at Gainford. Mr. K. Woluski is taking over the business.

On Friday evening a dance was held at the hall but the crowd was small owing to the fact that some of the farmers are still combining and threshing.

Cattlemen Propose Artificial Breeding Unit, Edmonton Area

The Edmonton and District Milk and Cream Producers' Association have formulated a plan for establishing an artificial breeding unit at Edmonton. The association hopes that its members will favor the proposal and breed a large number of cows artificially.

Arrangements have been made to obtain semen from the Maple Breeding Association, at Maple.

QUESTIONS and ANSWERS about Cancer

QUESTION: What does one look for in a mole or wart to see if it is cancer?

ANSWER: Any mole or wart that changes size, shape or color, bleeds, itches or in any other way shows it is being irritated should be suspected of being cancer. Final decision rests on the microscopic appearance of removed tissue.
